About Me

I am a final-year Artificial Intelligence student at Hazara University with expertise in Machine Learning, Deep Learning, and AI-driven automation. Specializing in LLMs, Python, and automation frameworks, I have experience integrating AI models into real-world applications. Skilled in Python, Django, Flask, PyTorch, and scikit-learn, I am eager to apply my knowledge to AI-powered workflows and contribute to impactful projects.

Experience

Web Developer I Developed scalable Django web applications with SQLite, ensuring Performance optimization, secure coding practices, and seamless user experience.

Education

2019-2021
Noor College
Intermediate

Focus on foundational engineering and computer science subjects, physics, and mathematics.

2021-2025
Hazara University
BSAI

specializing in Machine Learning, Artificial Neural Networks, Generative AI, and Web Development. My experience includes working on projects like MCQ generation, video summarization, and image-to-story conversion Sentiment Analysis System and Pakistan House Price Prediction . I aim to leverage my skills in AI and web technologies to contribute to innovative projects and research excellence in AI-driven solutions.

Language

English
Urdu
Pashto

Expertise

- **Python, JavaScript**
- **Django, Flask, PyTorch, scikit-learn**
- **ANN, LLM, ML, HTML, CSS, Bootstrap**

ACHIEVEMENTS

RunnerUp Youth Robo Tech (YRT-2024) in Futsal and Offroad Racing

Member of university tech society, contributing to robotics and AI-related events.
