SHAHEER UL ISLAM

work.shaheerulislam@gmail.com | linkedin.com/in/shaheer-ulislam | shaheer-ul-islam.github.io/Portfolio

PROFESSIONAL SUMMARY

Bachelor's graduate in Artificial Intelligence with hands-on experience in AI/ML, Generative AI, full-stack web development, and backend systems**.** Strong foundation in Python, PHP, JavaScript, SQL, machine learning, web application development, databases, and system troubleshooting. Experienced in developing, maintaining, and improving software systems across government and commercial environments, with a practical approach to problem-solving, system development, integration, testing, and deployment**.**

TECHNICAL SKILLS

Programming: Python, PHP, JavaScript, SQL

AI / Machine Learning: PyTorch, TensorFlow, Scikit-learn, Keras, OpenCV, Pandas, NumPy

Generative AI / LLM: RAG Pipelines, FAISS, LangChain, LlamaIndex, Hugging Face, OpenAI Whisper, Prompt Engineering

Web & Backend: Django,Flask, PHP, HTML5, CSS3, JavaScript, Bootstrap, REST APIs

Databases: MySQL, SQLite, SQL Server, Database Design, Query Optimization

PROFESSIONAL EXPERIENCE

Web Developer | Softrayz Solution *Jan 2026 – Current*

Hybrid / Remote

- Designed, developed, and maintained full-stack web applications for multiple clients, including e-commerce platforms, shop management systems, and educational institutions.
- Delivered local market e-commerce and physical-store integration for clients enabling seamless online and in-store operations.
- Built custom backend applications for businesses, including inventory management, order tracking, and administrative tools, as well as a nursing college management system.
- Implemented front-end and back-end features using PHP, JavaScript, HTML, CSS, and MySQL to deliver responsive, secure, and scalable web applications.
- Integrated product management systems and client-specific functionalities to optimize business operations, collaborating with clients to align technical delivery with business goals and providing ongoing maintenance and support.

Intern / Project Associate | PMRU, Govt. of Khyber Pakhtunkhwa *Aug 2025 – Jan 2026*

Performance Management & Reform Unit — Peshawar, Pakistan

- Built and deployed an E-Government AI Chatbot for KPK provincial officials using a Retrieval-Augmented Generation (RAG) pipeline with the OpenAI API and FAISS for semantic search over structured and unstructured government data.
- Improved response accuracy and reduced manual workload by enabling real-time, context-aware information retrieval across administrative workflows.
- Maintained and enhanced internal web systems, diagnosing bugs and resolving backend issues to ensure stable operation of government assessment platforms used by multiple departments.
- Developed and integrated new modules into existing platforms, contributing to UI/UX improvements and performance optimization.
- Collaborated with stakeholders to refine chatbot conversation flows, support testing and debugging, and iterate based on feedback ahead of production readiness.

EDUCATION

Bachelor of Science in Artificial Intelligence *Aug 2021 – Aug 2025*

Hazara University, Mansehra, Pakistan

Intermediate in Pre-Engineering *May 2019 – May 2021*

Noor College, Mansehra, Pakistan

LANGUAGES

English (Proficient) | Urdu (Native) | Pashto (Advanced)

PROJECTS

AI-Powered Video Analysis & Summarization System — *Final Year Project*
Python, Flask, OpenAI Whisper, Google Gemini, FAISS

- Developed an end-to-end AI pipeline that transforms long-form videos into structured summaries using OpenAI Whisper for speech-to-text and Google Gemini for summarization, Q&A, and flashcard generation.
- Integrated FAISS for semantic content indexing, enabling fast and accurate retrieval; shipped chatbot interaction, quiz generation, and multilingual translation features.

Naimat Shoes — Multi-Vendor E-Commerce & POS — *niamatshoes.com — Live*
PHP, MySQL, JavaScript, Bootstrap

- Developed a full-featured multi-vendor e-commerce platform with catalog management, shopping cart, order processing, and an admin dashboard, plus an integrated POS module with barcode scanning and real-time inventory sync.

Stylo Boutique — Fashion E-Commerce & POS — *styloboutique.com — Live*
PHP, MySQL, JavaScript

- Built an e-commerce platform with custom tailoring order management and an in-store POS covering payment processing, order tracking, and inventory management.

Online HMD — Home-Made Food Marketplace & POS — *onlinehmd.com — Live*
PHP, MySQL, JavaScript

- Developed a marketplace platform connecting home-based food sellers with customers, featuring product listings, online order placement, payment processing, and delivery coordination.

ArtGallery — Django Web Application
Django, SQLite, HTML/CSS, Bootstrap

- Built a responsive online art gallery with artist upload functionality, user authentication, admin controls, and category-based artwork browsing and purchasing.

Disease Diagnosis System
Python, Scikit-learn, Pandas, Streamlit

- Built a symptom-based predictive ML model with a Streamlit interface, handling the full pipeline: data cleaning, feature selection, model training, and evaluation.

CERTIFICATIONS

- **IBM Machine Learning Professional Certificate** — IBM/Coursera. Predictive modeling, classification/regression, clustering, and hands-on model building.
- **Google IT Support Professional Certificate** — Google/Coursera. Troubleshooting & debugging, networking fundamentals, Linux/Windows administration, and IT security best practices.

ACHIEVEMENTS & ACTIVITIES

- **Runner-Up** — Youth Robo Tech (YRT-2024): recognized for teamwork and technical execution under pressure.
- **Participant** — Youth Robo Tech (YRT-2025).
- **Tech Society Member** — Society of Technology, Hazara University.
